### Aims and objectives of this session
Renal transplant is an essential part of Urology. The aims of the course are:
- To show surgical techniques of organ procurement in deceased and living donation settings
- To establish the basic principles for evaluation of candidates to donation and recipients of kidney graft
- To show the different approaches and surgical details of kidney transplant in conventional and complex recipients
- To review the algorithms for diagnosis and treatment of medical and surgical complications after kidney transplantation

### 12:00 - 14:00

**Selection and urological preparation of transplant recipients; surgical aspects of nephrectomy in living and deceased donor**<br> A.J. Figueiredo, Coimbra (PT)

**Laparoscopic living donor nephrectomy: Technical aspects and controversies**<br> F.J. Burgos Revilla, Madrid (ES)

**Avoiding complications by proper techniques of renal transplantation; tricks and tips**<br> A.J. Figueiredo, Coimbra (PT)

**How to diagnose and manage postoperative and long-term complications following renal transplantation**<br> F.J. Burgos Revilla, Madrid (ES)
