

Advanced course on upper tract laparoscopy (kidney, UPJ, adrenal and stones)

ESU Course 28

Sunday, 26 March
14:30 - 17:30

Location: Room 10, Capital suite (level 3)

Chair: G. Janetschek, Salzburg (AT)

Aims and objectives of this session

Surgery of the kidney and adrenal gland by means of laparoscopy is standard of care.

Approach: Transperitoneal, retroperitoneoscopy, posterior approach, direct approach through the mesentery of the colon. Each has specific advantages.

Procedures: Virtually all ablative procedures concerning the adrenal, kidney and ureter, but also reconstruction. Rarely but effectively stone surgery.

Presentation: Power-point, interactive, videos, analysis of complications.

-For surgery of the kidney and adrenal, the da Vinci robot is often overkill. Therefore standard laparoscopy should be mastered in addition.

– Choice of the perfect approach makes the respective surgery easier and safer.

Standard laparoscopy is greatly facilitated by 3D vision.

– When mastering both laparoscopic surgical skills and the surgical concept of the respective procedure complications can either be avoided or managed appropriately.

14:30 - 17:30

Approach: Transperitoneal, retroperitoneoscopy

G. Janetschek, Salzburg (AT)

14:30 - 17:30

Nephrectomy, nephroureterectomy

A. Alcaraz, Barcelona (ES)

14:30 - 17:30

Pyeloplasty: Indication – technique – problems

H. Baumert, Paris (FR)

14:30 - 17:30

Stone surgery

A. Alcaraz, Barcelona (ES)

14:30 - 17:30

Adrenalectomy: Total and partial

H. Baumert, Paris (FR)

14:30 - 17:30

Complication management

G. Janetschek, Salzburg (AT)

14:30 - 17:30

Questions and discussion

A. Alcaraz, Barcelona (ES)

H. Baumert, Paris (FR)

G. Janetschek, Salzburg (AT)
