Aims and objectives of this session
This session deals with some more acute urological traumatic issues. The first is a classic and will deal with the moment of reconstruction of posterior urethral injuries. The debate highlights when it is imperative to insert a suprapubic catheter in the acute phase of a pelvic fracture related urethral injury. In addition, it will discuss when suprapubic catheter is preferred above or can be considered as alternative to direct realignment. The state-of-the-art lectures deal with possible reconstruction after Fournier’s gangrene and after penile cancer.

10:30 - 11:10 Debate Acute management of a posterior urethral injury after pelvic fracture

10:30 - 10:50 Direct alignment
F. Campos Juanatey, Santander (ES)

10:50 - 11:10 Suprapubic catheter first
N. Lumen, Gent (BE)

11:10 - 11:30 State-of-the-art lecture Fournier’s gangrene: Treatment and surgical reconstruction
A. Kadioglu, Istanbul (TR)

11:30 - 11:50 State-of-the-art lecture Penile reconstruction after trauma and cancer
N. Broer, Munich (DE)

11:50 - 12:00 Associated abstract presentation
Comparative assessment of postoperative erectile function and quality of life in male one-stage onlay vs. inlay buccal mucosal graft urethroplasty
Institutes: University Medical Center Hamburg-Eppendorf, Dept. of Urology, Hamburg, Germany
