Thematic Session 02

Expert challenges expert

Thematic Session 02

Sunday, 26 March
10:30 - 12:00

Location: Room Milan, North Hall (Level 1)

Chairs: B. Djavan, Vienna (AT)
        G. Janetschek, Salzburg (AT)

Aims and objectives of this session
Salvage prostatectomy is technically more difficult than primary prostatectomy, and the
complication rate is higher. The videos demonstrate that it can be performed by either open
surgery or robot-assisted laparoscopy. The advantages and disadvantages of either
technique will be discussed.
EPLND - the gold standard - has a false negative rate of at least 10%. This rate can by
decreased by super extended PLND, but the price is decreased specificity, longer operative
time, and possibly a higher complication rate. The solution may be targeted PLND such as
sentinel PLND which allows to increase specificity, sensitivity and accuracy. Two different
concepts of sentinel PLND will be presented.

10:30 - 11:15
Salvage prostatectomy - How I do it?

10:30 - 10:50
Open salvage prostatectomy

Presenter
A. Heidenreich, Cologne (DE)

Discussant
D. Murphy, Melbourne (AU)

10:50 - 11:10
Robotic salvage prostatectomy

Presenter
D. Murphy, Melbourne (AU)

Discussant
A. Heidenreich, Cologne (DE)

11:10 - 11:15
Discussion

11:15 - 12:00
Extent of primary lymph node dissection

11:15 - 11:35
Sentinel node

Presenter
H.G. Van Der Poel, Amsterdam (NL)

Discussant
