Aim and Objectives of this Session
The new format of semi-live surgical video presentations allows to compare and discuss different surgical techniques of robot-assisted radical prostatectomies. State-of-the art surgeons are challenged by other state-of-the art surgeons on an exquisite international level. The aim of this session is to practically demonstrate pros and cons of a personally preferred surgical technique to allow the auditorium to make up its own mind regarding special surgical tips and tricks.

V90
Saphenous-sparing laparoscopic inguinal lymphadenectomy
By: Chiapparrone G.¹, Rapisarda S.², De Concilio B.³, Zeccolini G.³, Trombetta C.¹, Celia A.³
Institutes: University of Trieste, Dept. of Urology, Trieste, Italy, ²University of Catania, Dept. of Urology, Catania, Italy, ³San Bassiano Hospital, Dept. of Urology, Bassano del Grappa, Italy

10:36 - 10:56
Video presentation Conventional nerve-sparing robot assisted radical prostatectomy
A. Mottrie, Aalst (BE)
Aim and Objectives of this Session
The aim is to show the ORSI technique of antegrade nerve sparing during RARP. According to the preoperative data, the right plane of dissection can be chosen in an oncological safe way. This video-based presentation will show tips & tricks.

10:56 - 11:04
Panel discussion

11:04 - 11:24
Video presentation Retzius-sparing robot assisted radical prostatectomy
A. Bocciardi, Milan (IT)
Aim and Objectives of this Session
Retzius-sparing robotic prostatectomy has been developed in 2010. Since then, more than 1100 cases have been performed in Milan and several hundreds in other centers worldwide. The aim of this presentation are to provide a step-by-step guide to this kind of approach highlighting the functional advantages of the technique.

11:24 - 11:32
Panel discussion

11:32 - 11:52
Video presentation Management of inguinal hernias during robot assisted radical prostatectomy
A.E. Canda, Ankara (TR)
Aim and Objectives of this Session
This presentation focuses on repair of inguinal hernias during robotic radical prostatectomy (RARP). Types of inguinal hernias, diagnosis, indications and contraindications for repair at the
time of the RARP procedure, types and use of mesh materials during repair, preoperative and postoperative precautions will be discussed.

11:52 - 12:00

Panel discussion

10:30 - 12:00

Panel of commentators
M.R. Cooperberg, San Francisco (US)
R. Rabenalt, Düsseldorf (DE)
K.H. Rha, Seoul (KR)
