Treat ing urological cancers: New twists and turns in the road

**Location:** Room Stockholm, North Hall (Level 1)

**Chair:** N. James, Birmingham (GB)

**Aims and objectives of this session**
- Give an overview of the progress in prostate cancer diagnosis and management to date, with a focus on potential future advances in hormone manipulation in the field
- Provide an update on the recent changes in the RCC treatment landscape from the adjuvant to first- and second-line settings
- Educate attendees on the role of enhanced visualisation techniques in bladder cancer in terms of diagnosis and staging, as well as the resulting clinical outcomes.

**18:00 - 18:05**

**Welcome and introduction**
N. James, Birmingham (GB)

**18:05 - 18:30**
