Stress incontinence in women

**Location:** Room Vienna, North Hall (Level 1)

**Chairs:**
- T.J. Greenwell, London (GB)
- M. Plata, Bogota (CO)
- G. Van Koeveringe, Maastricht (NL)

**Aims and objectives of this session**
Primary and secondary SUI treatments will be reviewed.

Poster viewing of 20 minutes. Presentations will take place on stage. Standard presentations are 2 minutes in length, followed by 2 minutes for discussion. Extended presentations (*) are 3 minutes in length, followed by 3 minutes for discussion.

---

855

**Which one stands longer? 20 years experience in retropubic sub-urethral sling surgery for female stress urinary incontinence: Comparison between autologous fascia and prolene mesh**
Institutes: Taipei Veterans General Hospital, Dept. of Urology, Taipei, Taiwan

856

**Preventing early voiding problems after midurethral sling placement: Should we sleep on it?**
By: Bergman A.², Vrooman O.¹, Van Balken M.¹
Institutes: Rijnstate Ziekenhuis, Dept. of Urology, Arnhem, The Netherlands, Rijnstate Ziekenhuis, Dept. of Gynaecology, Arnhem, The Netherlands

857

**Management of urodynamic stress urinary incontinence in urethral diverticulum**
By: Barratt R., Spilotros M., Malde S., Pakzad M., Hamid R., Ockrim J., Greenwell T.
Institutes: University College London Hospital, Dept. of Urology, London, United Kingdom

858

**Comparative assessment of the efficiency of surgical methods of recurrent urinary incontinence**
Institutes: Moscow State University of Medicine and Dentistry Named After A.I. Evdokimov, Dept. of Urology, Moscow, Russia

859

**Artificial urinary sphincter (AMS800) implantation in women: Rare indications and acceptable complications rate**
By: Sayed Ahmed K., Kaftan B., Olianas R.
Institutes: Luneburg Hospital, Dept. of Urology, Lüneburg, Germany

860

**Robot-assisted artificial urinary sphincter implantation in female patients: A multicenter study**
By: Peyronnet B.¹, Belas O.², Capon G.², Manunta A.¹, Tondut L.¹, Allenet C.³, Desportes L.⁴, Vincendeau S.¹, Belas M.², Perrouin-Verbe M-A.⁵, Gobeaux N.², Callerot P.⁵, Pastier G.³, Colla S.², Valeri A.³, Descazeaud A.², Robert G.³, Fournier G.⁵
Institutes: CHU Rennes, Dept. of Urology, Rennes, France, CHU Bordeaux, Dept. of Urology, Bordeaux, France, CHU Limoges, Dept of Urology, Limoges, France

861

**Artificial urinary sphincter implantation in women with stress urinary incontinence: Preliminary comparison of the robot-assisted and open approaches**
By: Peyronnet B.¹, Vincendeau S.¹, Tondut L.¹, Alimi Q.¹, Hascoet J.¹, Freton L.¹, Senal N.², Kerdraon J.², Bensalah K.¹, Manunta A.¹
Effect of bariatric surgery on urinary and fecal incontinence: Prospective analysis and one year follow up
By: Ait Said K. 1, Leroux Y. 2, Menahem B. 2, Doerfler A. 2, Alves A. 2, Tillou X. 1
Institutes: CHU de Caen, Dept. of Urology and Transplantation, Caen, France, 2CHU de Caen, Dept. of Abdominal Surgery, Caen, France

Three-month primary efficacy and six-month treatment arm results from the SUCCESS study of an intravesical balloon to treat female stress urinary incontinence (SUI)
By: Rovner E. 1, Jacoby K. 2, Kalota S. 3, Snyder J.A. 4, Cline K. 5, Robertson K. 6, Rardin C. 7, Kahan R. 8, Green L. 9, Elser D. 10, Zuckerman J. 11, Mc Cammon K. 1
Institutes: Medical University of South Carolina, Dept. of Urology, Charleston, United States of America, 1Integrity Medical Research, Dept. of Urology, Mountlake Terrace, United States of America, 2Urological Associates of Southern Arizona, Dept. of Urology, Tucson, United States of America, 3Genitourinary Surgical Consultants, Dept. of Urology, Denver, United States of America, 4Regional Urology Associates, Dept. of Urology, Shreveport, United States of America, 5Chesapeake Urology Associates, Dept. of Urology, Shreveport, United States of America, 6Woman and Infants Hospital, Dept of Urogynecology, Providence, United States of America, 7WomanCare, Dept of Urogynecology, Arlington Heights, United States of America, 8Virginia Women’s Center, Dept. of Urology, Richmond, United States of America, 9Women’s Health Institute of Illinois, Dept of Urogynecology, Oak Lawn, United States of America, 10Urology of Virginia, Dept. of Urology, Virginia Beach, United States of America

Effectiveness of adjustable slings (Remex system™) in women with stress urinary incontinence due to intrinsic sphincter deficiency
By: Plata M. 1, Robledo D. 1, Bravo-Balado A. 1, Castaño J.C. 4, Osorio C. 2, Salazar M. 3, Velásquez J. 5, Trujillo C. 1, Caicedo J. 1, Cataño J. 1
Institutes: Hospital Universitario Fundación Santa Fe De Bogotá, Dept. of Urology, Bogotá, Colombia, 1Clínica Confamiliar De Risaralda, Dept. of Urology, Pereira, Colombia, 2Fundación Oftalmológica De Santander Clínica Carlos Ardila Lülle, FOSCAL, Dept. of Urology, Bucaramanga, Colombia, 3Clínica Universitaria CES, Dept. of Urology, Medellin, Colombia, 4Clínica Medellin and Universidad CES, Dept. of Urology, Medellin, Colombia

Transurethral injections of polyacrylamide hydrogel (Bulkamid®) for treatment of female stress urinary incontinence (SUI) in DGH settings
By: Hamed A.H., Bekarma H., Rewhorn M., Nair B.
Institutes: University Hospital of Ayr, Dept. of Urology, Ayr, United Kingdom

The autologous fascia mid-urethral ‘sling on a string’, a viable and effective alternative to synthetic tape surgery
By: Hillary C., Osman N., Inman R., Mangera A., Chapple C.
Institutes: Royal Hallamshire Hospital, Dept. of Reconstructive Urology, Sheffield, United Kingdom

ACT sphincteric prosthesis results in women over the age of 80 years old with a past history of radiotherapy treatment
Institutes: CHU Rennes, Dept. of Urology, Rennes, France
