Aims and objectives of this session
To date, radical surgery represents the only potentially curable therapeutic intervention for patients with urothelial carcinoma of the upper tract (UTUC). Although the role of lymphadenectomy in these tumors has not yet been clarified, recent evidence has shown that in patients with locally advanced tumors, it improves staging and consequently could help in selecting patients for adjuvant chemotherapy. UTUC and bladder carcinomas, are considered to be relatively chemosensitive. In fact, most of the data regarding the clinical efficacy of chemotherapy in the neoadjuvant and adjuvant settings are based on outcomes from the treatment of bladder UC. Contrary to what has been demonstrated for bladder cancer, there have been no convincing reported effects of neoadjuvant chemotherapy for UTUCs. Adjuvant chemotherapy achieves a remission rate of up to 50% but has minimal impact on survival. Systemic recurrences are common in this disease, however, and it is therefore reasonable to consider perioperative chemotherapy in an effort to decrease a patient’s risk of recurrence. The aim of this session is to discuss modern outcomes after radical nephroureterectomy and perioperative chemotherapy.

Poster viewing of 20 minutes. Presentations will take place on stage. Standard presentations are 2 minutes in length, followed by 2 minutes for discussion. Extended presentations (\textsuperscript{)} are 3 minutes in length, followed by 3 minutes for discussion.

\textsuperscript{1158} Effectiveness of adjuvant chemotherapy after radical nephroureterectomy for locally advanced and/or positive regional lymph node upper tract urothelial carcinoma
By: Seisen T.\textsuperscript{1}, Krasnow R.\textsuperscript{1}, Bellmunt J.\textsuperscript{2}, Rouprêt M.\textsuperscript{2}, Leow J.\textsuperscript{1}, Lipsitz S.\textsuperscript{1}, Vetterlein M.\textsuperscript{3}, Preston M.\textsuperscript{1}, Hanna N.\textsuperscript{1}, Kibel A.\textsuperscript{1}, Sun M.\textsuperscript{1}, Choueiri T.\textsuperscript{2}, Trinh Q-D.\textsuperscript{1}, Chang S.L.\textsuperscript{1}
