**Infectious challenges of urology**

*Poster Session 06*

**Location:** Room Milan, North Hall (Level 1)

**Chairs:**
- R. Bartoletti, Pisa (IT)
- B. Köves, Budapest (HU)
- P. Tenke, Budapest (HU)

**Aims and objectives of this session**

This session presents the latest information for the care of your patients.

Poster viewing of 20 minutes. Presentations will take place on stage. Standard presentations are 2 minutes in length, followed by 2 minutes for discussion.

**76**

**Risk factors for mortality in patients with urosepsis**

*By:* Fukunaga A., Kawakita M.

*Institutes:* Kobe City Medical Center General Hospital, Dept. of Urology, Kobe, Japan

---

**78**

**A novel predictive tool for Asian Fournier's gangrene: 40 cases and 15-year-experience of a tertiary center**

*Institutes:* Cardinal Tien Hospital, Division of Urology, Dept. of Surgery, New Taipei City, Taiwan, 2National Taiwan University Hospital, Dept. of Urology, Taipei, Taiwan

---

**79**

**Identification of distant subcutaneous spreading of Fournier’s gangrene by intraoperative ultrasound**

*By:* Cantoro D.1, Galosi A.B.1, Maselli G.1, Sbrollini G.1, Fulvi P.1, Dell’Atti L.2

*Institutes:* Università Politecnica Delle Marche - Ospedali Riuniti di Ancona, Dept. of Urology, Ancona, Italy, 2Ospedale S. Anna, Dept. of Urology, Ferrara, Italy

---

**80**

**Five-year prospective study evaluating healthcare-associated infections (HAIs) in a urology ward: Risk factors, microbiological characteristics and resistance patterns**

*Institutes:* Hospital Universitario 12 de Octubre, Dept. of Urology, Madrid, Spain

---

**81**

**Quick SOFA score might be inadequate as initial sepsis screening system in UTI patients**

*Institutes:* Yamagata University, School of Medicine, Dept. of Urology, Yamagata City, Japan

---

**82**

**Detecting bacterial resistance in urine at the point of care via a custom tailored LAMP panel**

*By:*
Establishment of a 3D organotypic urothelial cell culture model as infection model system for BK polyomavirus – viral lifecycle and identification of new therapeutic targets
