Experimental approaches in personalised medicine in urothelium tumours
Poster Session 39

Location: Room Madrid, North Hall (Level 1)
Chairs: F. Deho, Milan (IT)  
M. Knowles, Leeds (GB)  
M. Sanchez-Carbayo, Vitoria-Gasteiz (ES)

Aims and objectives of this session
The course of bladder cancer could be affected by many factors. In order to predict the course of the disease, it is important to analyze multiple parameters. Studies presented in this session will focus also on exosomes and miRNA.

Poster viewing of 20 minutes. Presentations will take place on stage. Standard presentations are 2 minutes in length, followed by 2 minutes for discussion. Extended presentations (*) are 3 minutes in length, followed by 3 minutes for discussion.

*519 Tumor-associated exosomes of urothelial bladder cancer cells affect tumor-promoting processes in normal bladder fibroblasts and support tumorigenesis
