

Urogenital reconstructions

Thematic Session 03

Sunday, 26 March
10:30 - 12:00

Location: Room Madrid, North Hall (Level 1)

Chairs: R. Djinovic, Belgrade (RS)
A.R. Mundy, London (GB)

Aims and objectives of this session

This session deals with some more acute urological traumatic issues. The first is a classic and will deal with the moment of reconstruction of posterior urethral injuries.

The debate highlights when it is imperative to insert a suprapubic catheter in the acute phase of a pelvic fracture related urethral injury. In addition, it will discuss when suprapubic catheter is preferred above or can be considered as alternative to direct realignment. The state-of-the-art lectures deal with possible reconstruction after Fournier's gangrene and after penile cancer.

10:30 - 11:10

Debate Acute management of a posterior urethral injury after pelvic fracture

10:30 - 10:50

Direct alignment

F. Campos Juanatey, Santander (ES)

10:50 - 11:10

Suprapubic catheter first

N. Lumen, Gent (BE)

11:10 - 11:30

State-of-the-art lecture Fournier's gangrene: Treatment and surgical reconstruction

A. Kadioglu, Istanbul (TR)

11:30 - 11:50

State-of-the-art lecture Penile reconstruction after trauma and cancer

N. Broer, Munich (DE)

11:50 - 12:00

Associated abstract presentation

279

Comparative assessment of postoperative erectile function and quality of life in male one-stage onlay vs. inlay buccal mucosal graft urethroplasty

By: Vetterlein M., Rosenbaum C., Gild P., Meyer C., Ludwig T., Gödde A., Aziz A., Engel O., Dahlem R., Fisch M., Kluth L.

Institutes: University Medical Center Hamburg-Eppendorf, Dept. of Urology, Hamburg, Germany
