

Expert challenges expert

Thematic Session 02

Sunday, 26 March
10:30 - 12:00

Location: Room Milan, North Hall (Level 1)

Chairs: B. Djavan, Vienna (AT)
G. Janetschek, Salzburg (AT)

Aims and objectives of this session

Salvage prostatectomy is technically more difficult than primary prostatectomy, and the complication rate is higher. The videos demonstrate that it can be performed by either open surgery or robot-assisted laparoscopy. The advantages and disadvantages of either technique will be discussed.

EPLND -the gold standard- has a false negative rate of at least 10%. This rate can be decreased by super extended PLND, but the price is decreased specificity, longer operative time, and possibly a higher complication rate. The solution may be targeted PLND such as sentinel PLND which allows to increase specificity, sensitivity and accuracy. Two different concepts of sentinel PLND will be presented.

10:30 - 11:15

Salvage prostatectomy - How I do it?

10:30 - 10:50

Open salvage prostatectomy

10:30 - 10:50

Presenter

A. Heidenreich, Cologne (DE)

10:30 - 10:50

Discussant

D. Murphy, Melbourne (AU)

10:50 - 11:10

Robotic salvage prostatectomy

10:50 - 11:10

Presenter

D. Murphy, Melbourne (AU)

10:50 - 11:10

Discussant

A. Heidenreich, Cologne (DE)

11:10 - 11:15

Discussion

11:15 - 12:00

Extent of primary lymph node dissection

11:15 - 11:35

Sentinel node

11:15 - 11:35

Presenter

H.G. Van Der Poel, Amsterdam (NL)

11:15 - 11:35

Discussant

Thematic Session 02

N. Fossati, Milan (IT)

11:35 - 11:55

Extended lymph node dissection

11:35 - 11:55

Presenter

N. Fossati, Milan (IT)

11:35 - 11:55

Discussant

H.G. Van Der Poel, Amsterdam (NL)

11:55 - 12:00

Discussion
