

Treating urological cancers: New twists and turns in the road

Industry session by IPSEN PHARMA

Saturday, 25 March
18:00 - 19:30

Location: Room Stockholm, North Hall (Level 1)

Chair: N. James, Birmingham (GB)

Aims and objectives of this session

- Give an overview of the progress in prostate cancer diagnosis and management to date, with a focus on potential future advances in hormone manipulation in the field
- Provide an update on the recent changes in the RCC treatment landscape from the adjuvant to first- and second-line settings
- Educate attendees on the role of enhanced visualisation techniques in bladder cancer in terms of diagnosis and staging, as well as the resulting clinical outcomes.

18:00 - 18:05

Welcome and introduction

N. James, Birmingham (GB)

18:05 - 18:30

How far have we improved on prostate cancer management?

T. Lynch, Dublin (IE)

18:30 - 18:55

Systemic therapy in RCC – Current landscape and future directions

S. Osanto, Leiden (NL)

18:55 - 19:20

The future of non-muscle-invasive bladder cancer management

S. Shariat, Vienna (AT)

19:20 - 19:30

Questions and answers

N. James, Birmingham (GB)

T. Lynch, Dublin (IE)

S. Osanto, Leiden (NL)
