

## Treating urological cancers: New twists and turns in the road

Industry session by IPSEN PHARMA

**Saturday, 25 March**  
**18:00 - 19:30**

**Location:** Room Stockholm, North Hall (Level 1)

**Chair:** N. James, Birmingham (GB)

### **Aims and objectives of this session**

- Give an overview of the progress in prostate cancer diagnosis and management to date, with a focus on potential future advances in hormone manipulation in the field
- Provide an update on the recent changes in the RCC treatment landscape from the adjuvant to first- and second-line settings
- Educate attendees on the role of enhanced visualisation techniques in bladder cancer in terms of diagnosis and staging, as well as the resulting clinical outcomes.

18:00 - 18:05
