

Options in intracorporeal neobladder reconstruction

Video Session 03

Friday, 24 March
14:15 - 15:45

Location: Room Paris, North Hall (Level 1)

Chairs: J.W. Collins, Stockholm (SE)
F. D'Hondt, Aalst (BE)
H.S.S. Ho, Singapore (SG)

Aims and objectives of this session

Intracorporeal reconstructive surgery is challenging. The aims and objectives of this session are to present different approaches to intracorporeal neobladder reconstruction. Different centres of excellence will present their standardised approach and we will discuss the potential advantages (and disadvantages) from these different techniques and examine the current evidence.

All presentations have a maximum length of 8 minutes, followed by 4 minutes of discussion.
